Who we are?

ATP Founder,
Carolyn Mugar

Economic and Energetic Crisis in Armenia of the 1990's

Community Tree Planting

Nurseries

ARMENIA
TREEPROJECT

Forestry

Environmental Education

Building Bridges

Connecting Diaspora Armenian Students with their Environmental Heritage

To develop the capacity of Armenian schools to be significant drivers in the quest for environmental and cultural security.

We envision an Armenia where its citizens take a powerful role in determining the future development of a clean and healthy environment - an environment that encourages respect for the past with eyes on the future.

ARMENIA
TREE PROJECT

BENEFITS

Trees provide food

Trees clean the air & provide oxygen

Trees cool the city & streets by providing shade

Trees conserve energy

Plant trees on the south and west sides for maximum energy savings.

Plant trees 15-20 feet away from the house.

Trees increase property values

Trees mark the season

Trees provide a canopy and habitat for wildlife

Trees provide many resources such as wood and paper

Trees have medicinal value & can shield children from UV rays

Trees build a strong and healthy community

ARMENIA
TREE PROJECT

HOW TO PLANT A TREE

Step 1: Choose the right tree (Make sure tree is native to area so that it can tolerate the local climate)

Step 2:

Choose the right place

(Make sure that there is plenty of room for your tree to grow. Be sure to check the soil (dark in color and not a lot of rocks) and plenty of water available).

Step 3:

Plant the tree according to best practices

(Dig a deep hole and be sure to plant in autumn after all of the leaves fall OR in the spring just before trees start to grow new leaves)

Step 4: Take care of your tree

(Be sure to water regularly)

during the first growing season. Allow water to soak into the soil once or twice a week)
